

FAZE mini

Fixed Round

Fixed Square

81mm

81mm

Features

- Unique baffle design to minimise glare
- Quick release ring for easy lamp changing
- Neat design ensuring minimal gaps to increase energy efficiency and reduce dust

Specifications

- 3 Year warranty
- 100% aluminium fitting
- Italian lampholder with 600mm lead
- 70mm diameter cut out

Colours	Order Code
• White Satin	83-3000
• Anotec Off White	83-3001
• Black Satin	83-3003
• 24k Gold	83-3004
• Chrome	83-3005
• Satin Chrome	83-3006
• Silver	83-3007

FAZE

Changing the way you see things

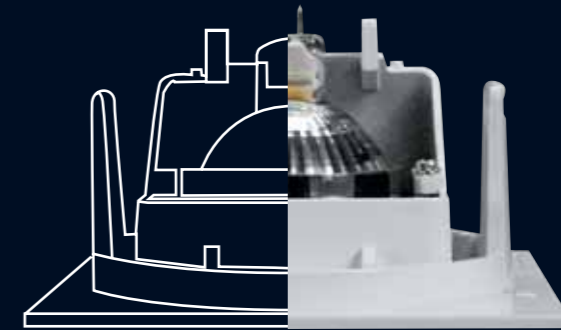

downlights

Recessed low voltage downlights have proven to be one of the most flexible and effective lighting solutions that has been developed in the last thirty years. However, since their original introduction there has been little advancement in the design of downlights. This is about to change.

the design process

Faze™ is a unique range of low voltage downlights now available in round and square configurations. In addition to a fixed version, a 360° rotatable model that tilts is included in the product range. The 'flush to the ceiling' design makes them energy efficient and completely dust free. An innovative baffle component on the Faze™ lighting range sets them apart from other downlights plus they are available for concrete canister installation.

Our concept incorporates the following astonishingly simple factors:

efficiency > environmentally friendly to protect our world

versatility > good looking and functional

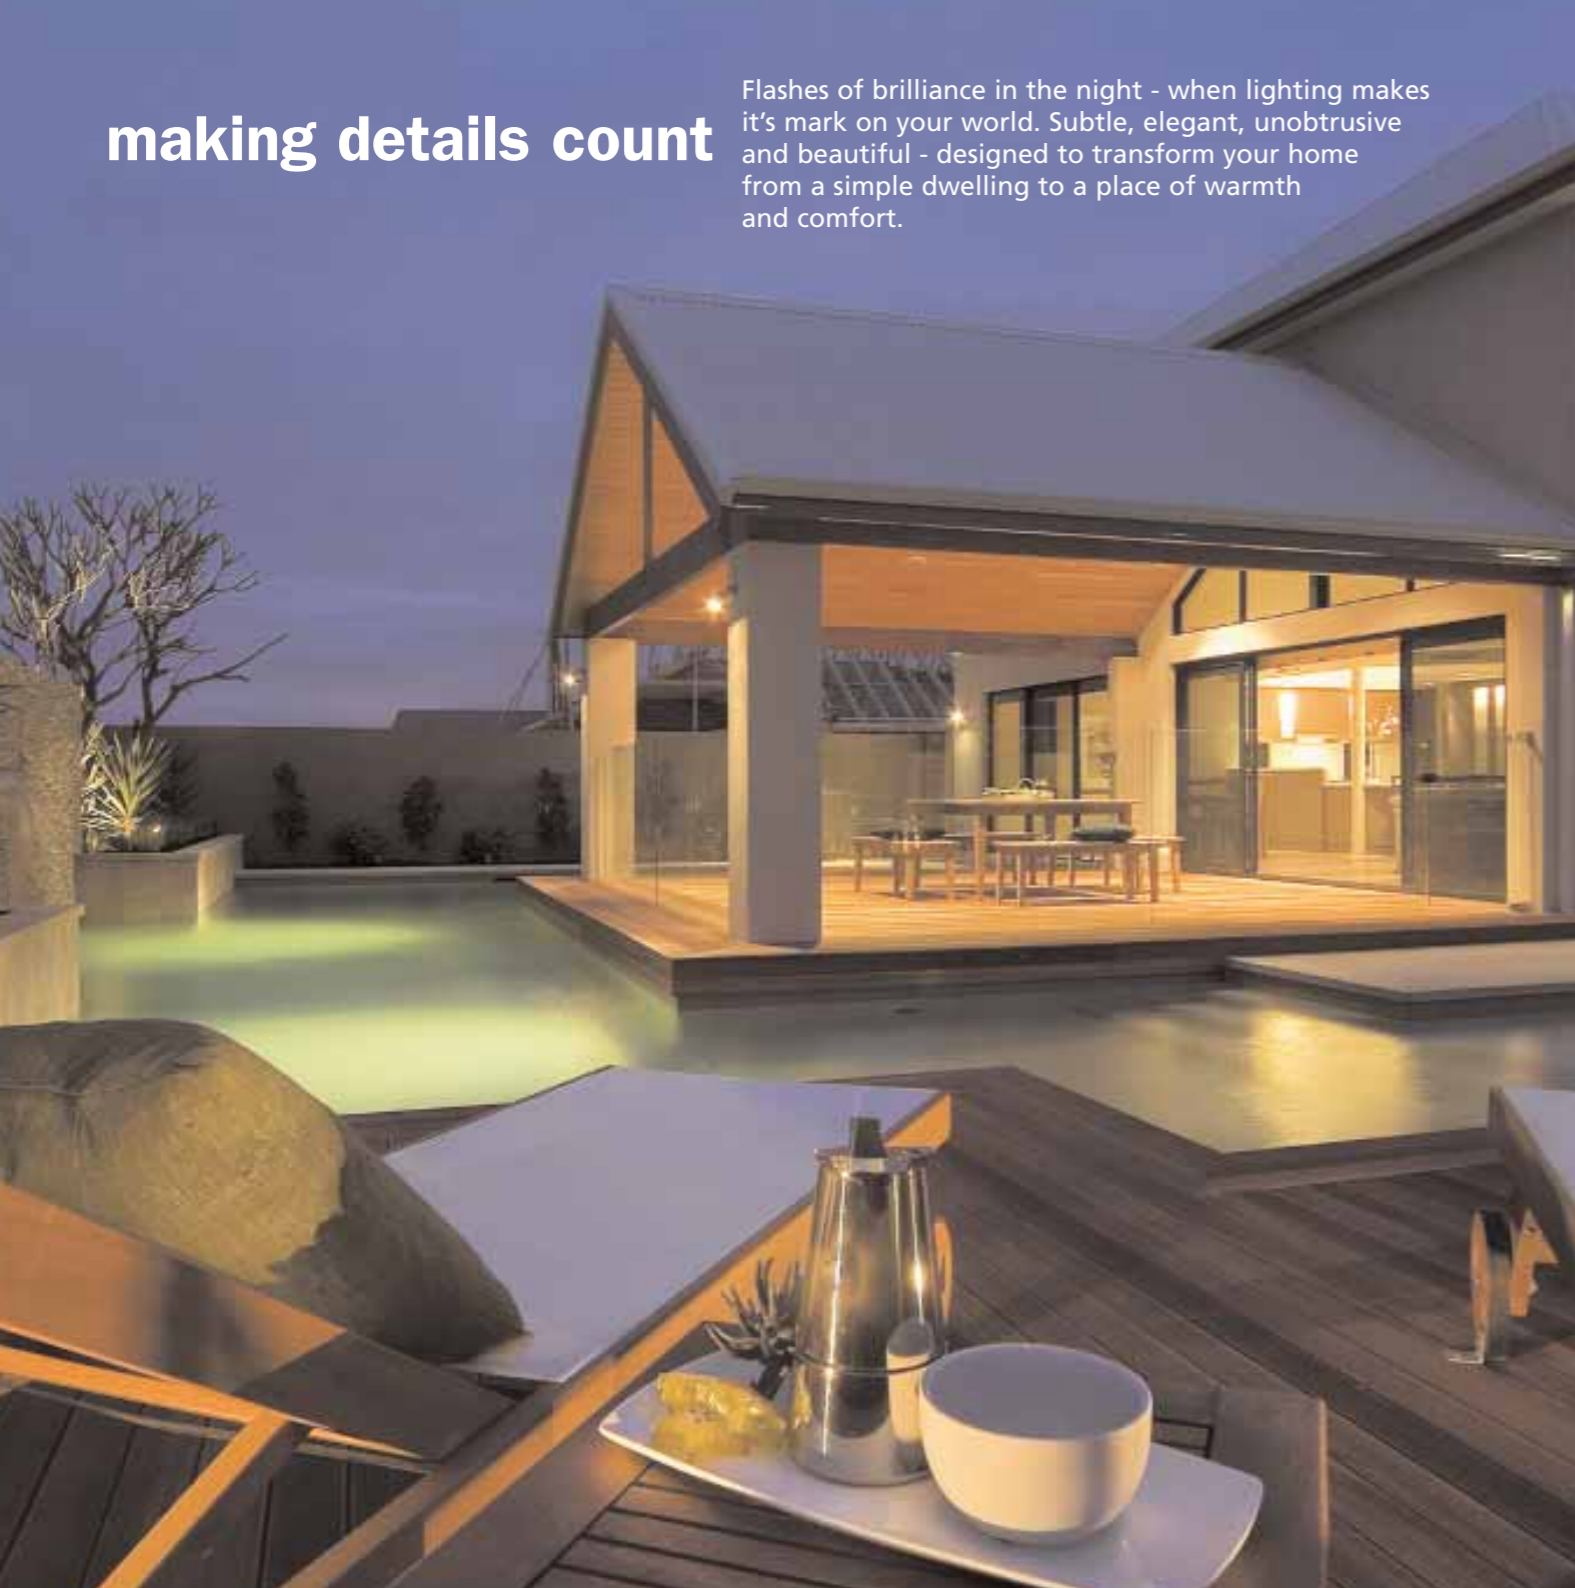

difference > high quality and elegant

simplicity > easy to install and maintain

choice > a range of modern finishes

making details count

Flashes of brilliance in the night - when lighting makes its mark on your world. Subtle, elegant, unobtrusive and beautiful - designed to transform your home from a simple dwelling to a place of warmth and comfort.

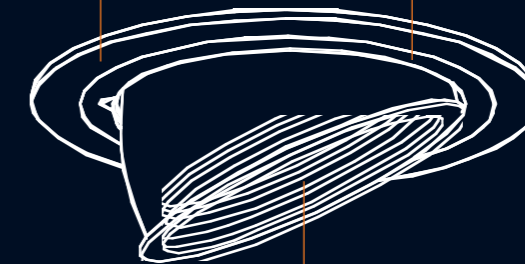

flexibility is the key

The rotation ring permits a full 360° of movement to allow for microadjustment when light placement is critical

Tilts 40° to allow directional alignment on specific objects such as wall hangings or ornaments

Interior light baffle minimises light scatter and gives a softer, warmer downlight

mix and match

Downlights that are as flexible as your decor.

Now you can choose from a range of exterior and interior rim combinations that will work with your colour choices and compliment any room decoration.

colour combinations

With seven different base colours for the inner and outer rims Faze™ takes colour matching to a new level. Now you can integrate your downlights with wall and ceiling colour palettes or match your lights to room finishes and fittings. Once downlights were lifeless, now they bring a room to life.

> White Satin > Chrome > Anotec Off White

> Satin Chrome > Black Satin > Silver > 24k Gold Plated

use any two combinations of colours

thinking green

We believe we've got the green light, it's the type of social responsibility that places Faze™ at the cutting edge of lighting design.

our environment

Concerns about the environment and how we interact with it have become a priority for governments, industries and citizens alike and the Faze™ range of low voltage downlights are making an impact. We continuously strive to source technologies from around the world, to make our products more efficient and envirofriendly in everything from manufacturing process to the type of globes we put into our fittings.

The result is an ongoing process of evaluation and action, where it's possible to incorporate advanced techniques and newer components into our lights, Faze™ takes them onboard and responds quickly. It will be a long program that will never end - nothing stands still, everything changes and we must change with it - that's our philosophy.

Complex concerns, simple outcomes:

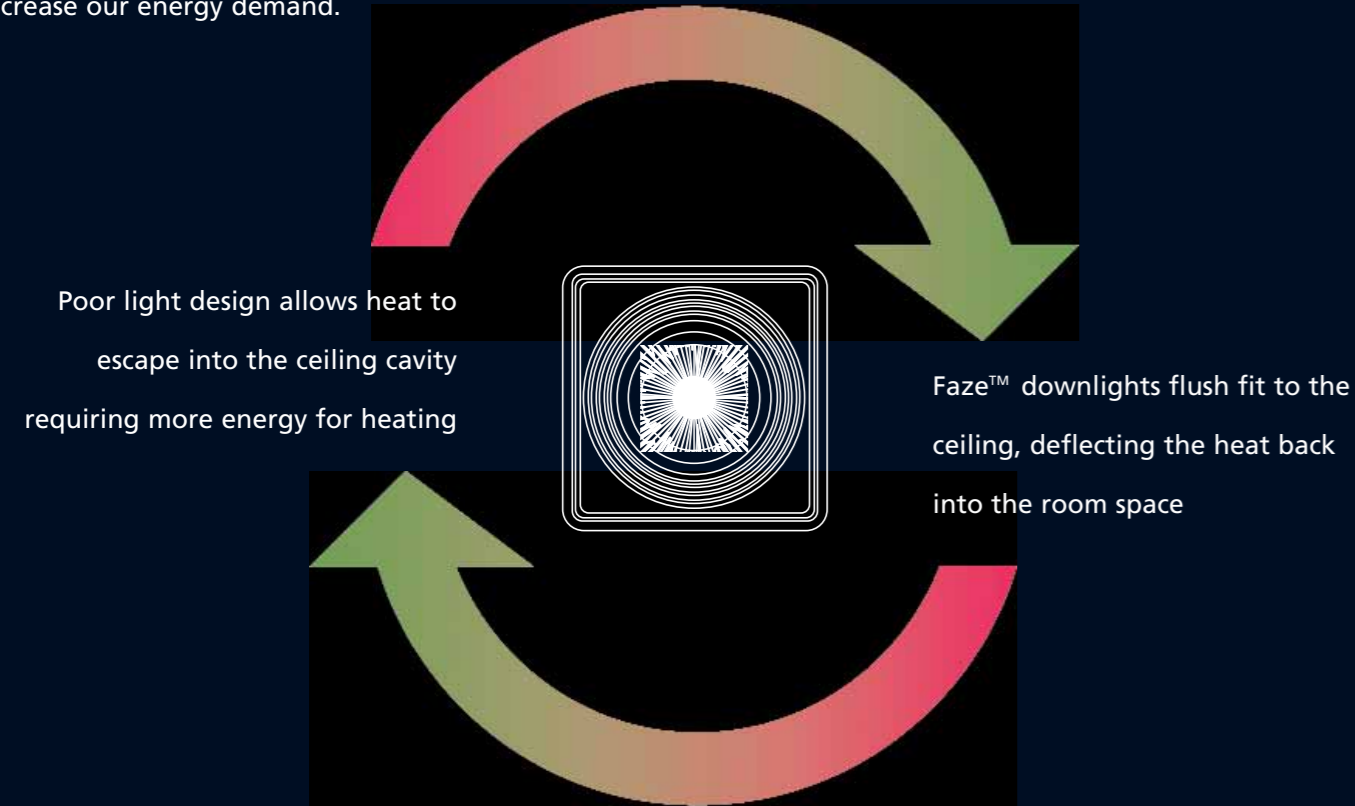

social responsibility > actually believing we can make a difference

technology > using advances in manufacturing to create efficiency

development > creating processes that protect us all

efficiency to help the planet

Faze™ downlights are a completely sealed unit that prevents the dissipation of heat into the ceiling cavity. Heat loss through poorly designed light fixtures contribute to the inefficiency of the home or office air circulation system and increase our energy demand.

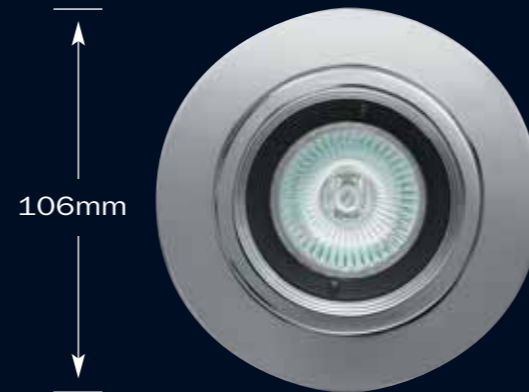

Smart thinking, big benefits:

identifying problems > designs that actually work

thinking ahead > long term solutions with ongoing benefits

FAZE₀₁

Fixed Round

Features

- Unique baffle design to minimise glare
- Quick release ring for easy lamp changing
- Neat design ensuring minimal gaps to increase energy efficiency and reduce dust
- Available in many colour combinations
- Available in concrete version

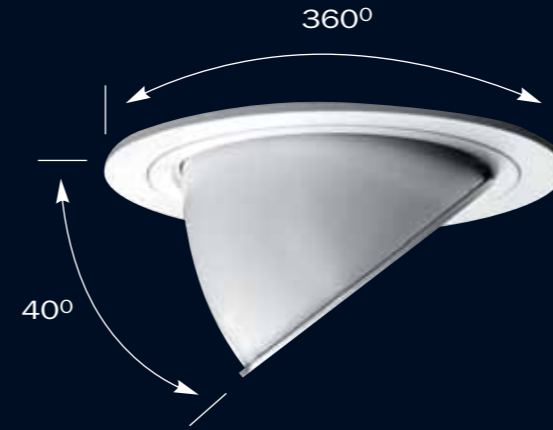

Specifications

- 3 Year warranty
- 100% aluminium fitting
- Italian lampholder with 600mm lead
- 95mm diameter cut out

Colours Order Code

- White Satin 83-1000
- Anotec Off White 83-1001
- Black Satin 83-1003
- 24k Gold 83-1004
- Chrome 83-1005
- Satin Chrome 83-1006
- Silver 83-1007

Tilt-Swivel Round

Features

- Unique baffle design to minimise glare
- Quick release ring for easy lamp changing
- Tilt to 40° and swivel through 360°
- Neat design ensuring minimal gaps to increase energy efficiency and reduce dust
- Available in many colour combinations
- Available in concrete version

Specifications

- 3 Year warranty
- 100% aluminium fitting
- Italian lampholder with 600mm lead
- 95mm diameter cut out

Colours Order Code
